Nevada teachers are engaged in an activity involving the periodic table at the 26th Annual Southern Nevada Teacher Workshop hosted by the Nevada Mining Association from March 31-April 1, 2015. During this activity, the teachers learned how to incorporate earth science into their classrooms.

Nevada teachers go on a mine tour for a field trip as part of the Nevada Mining Association's 26th Annual Southern Nevada Teacher Workshop from March 31-April 1, 2015. This hands-on experience showed the teachers the impact that mining has on every day life.
